CHALLENGE	BEST SECURITY SOLUTION
<b>SecurityTheft/ Robbery</b>	Controlled area security helps prevent losses from robbery and outside intrusion. Internal theft can be controlled by monitoring user's entry or exit and our central station staff will notify management of unauthorized access to certain areas.
<b>Fire</b>	Code compliant, quality and reliable fire alarm systems provide rapid notification to protect life and property.
<b>Critical Area Surveillance</b>	Video Surveillance is effective for watching and monitoring buildings or critical areas of concern and to protect assets while providing personal safety. It also protects against false accident claims, reduce premise liability, and boost worker productivity to improve your bottom line.
<b>Limited Security Staff</b>	Multiple locations can be monitored by one central location or let out staff remotely "watch over" your location with services such as remote video monitoring, virtual guard tours, and custom virtual guard escorts. Replace standing guards and save!
<b>Critical Equipment Monitoring</b>	Important equipment such as a freezer, air conditioner, and compressor or water sensors can be monitored so you can be notified immediately before the failure or leakage becomes costly.
<b>Response Times</b>	Our state of the art U.L. central station meets and exceeds the highest standards in the industry. Inspected and approved by Underwriters Laboratory and is designed for reliability and proficiency.
<b>Verified Response</b>	Best Security Products signature Audio/Video Verification methods have proven to be the best solution to eliminate false alarms and provide faster police response. Interactive monitoring is the combination of advanced technology and human intelligence to verify that the threat is real.
<b>Facility Management</b>	Our eLink allows easy log in access to all your account information and history.
